# Unsuspected COVID-19 PPE General Area

## Hand hygiene

Wash your hands with non-antimicrobial liquid soap and water if:

• visibly soiled or dirty;

• caring for a patient with a suspected or known gastro-intestinal infection e.g. norovirus or a spore forming organism i.e. *C.difficile* 

• Immediately after removal of PPE.

In all other circumstances alcohol based hand rub can be used as an alternative to hand washing with liquid soap and water.

## Eye Protection / Visor \*

\*self assessment of risk for eye protection session or single use

### Fluid Resistant Surgical Mask\*

\*self assessment of risk for mask session or single use

### **Gloves must be:**

• worn when exposure to blood and/or other body fluids is anticipated/likely e.g. toileting or taking blood;

• changed immediately after each patient and/or following completion of a procedure or task;

• changed if a perforation or puncture is suspected;

• appropriate for use, fit for purpose and well-fitting.

Please refer to the full UK COVID-19 guidance for Infection Prevention and Control on the HPS COVID-19 web page

#### Aprons must be:

• worn to protect uniform or clothes when contamination is anticipated/likely e.g. when undertaking direct care e.g. assisted wash or aseptic/clean task

• changed between patients and/or following completion of a procedure or task.

Remember to perform hand hygiene following removal/disposal of PPE.
