 GREENTECH GLOBAL
PURE GENIUS

AquaTech

GREENTECHGLOBAL AquaTECH®

A natural, multipurpose sanitiser
and cleaner... on tap!

- Only uses ordinary tap water, fed through a standard water softener, and food grade salt... that's all!
- No added detergents or harmful chemicals to be mixed, stored or discarded
- A 100% natural, all purpose cleaning and sanitising solution that works faster and more effectively than environmentally harmful chemical cleaning solutions.

The cleaner, greener, easier sanitiser

- The AquaTeck™ system produces up to six litres a minute of 'Activated Water' (AW) – a 100% natural sanitising and cleaning solution
- Activated Water contains hypochlorous acid (HOCl), which is a naturally occurring steriliser with no harsh chemicals involved
- Also known as Freely Accessible Chlorine (FAC), HOCl is the world's strongest natural steriliser and works faster and more effectively than any other comparable aggressive and expensive chemical sanitisers
- Activated Water can be used in re-usable spray-bottles, mops and buckets and even via industrial floor cleaners
- The solution reverts back to H₂O and salt, for safe and easy disposal.

**Better for your
cleaning staff,
better for your
workplace
and better for
the environment.**

GREENTECHGLOBAL AquaTeci®

Where there's a tap there's a way

- Easily mounted on the wall, the flexible design means the unit can fit into even the most congested cleaning cupboards
- On demand production of a 100% natural, multipurpose, powerful sanitising and cleaning solution that kills bacteria, mould and mildew
- Reduced operating costs, increased productivity and safety. No moving parts, no user serviceable parts so only requires a quick and simple descaling flush once a month.

Safer for your staff, safer for the environment

- No COSHH – no worries about mixing and handling dangerous chemicals and the associated health hazards to staff, customers and guests
- Lower carbon footprint involved in purchasing, transporting, storing, mixing, using and disposing of chemicals and their associated packaging
- No mixing, rinsing, fumes or toxins no corrosive effects of chemicals on the surfaces and equipment
- Meets highest safety and performance standards - conforms to Regulatory EN13697
- Activated Water is approved by the EPA and FDA under 21 CFR 173.315 for direct contact with processed foods
- 100% natural, environmentally friendly and sustainable.

A safer more efficient and effective solution

In an extensive two week care home trial, AquaTeck Activated Water outperformed existing chemical based cleaning solutions across all test areas.

- The industry standard for measuring levels of cleanliness in terms of hygiene, using a Luminometer, is Relative Light Units (RLU) - High RLU = dirty, low RLU = clean
- Swab tests for RLUs were taken both before and after use in different locations.

Remarkably impressive results

Floor in front of waste bin

RLU before cleaning 810

RLU after cleaning 93

Reduction 89%

Kitchen table

RLU before cleaning 2000

RLU after cleaning 102

Reduction 95%

Door sill

RLU before cleaning 11800

RLU after cleaning 480

Reduction 96%

Kitchen floor

RLU before cleaning 2500

RLU after cleaning 86

Reduction 97%

The perfect solution... **on tap**

- Considerable cost savings in the long run
- Totally safe, 100% natural, no chemicals, no COSHH
- So easy to use, just fill up and go
- When you run out just simply refill
- No plastic pollution or bottle waste
- No storage problems
- No delivery waiting time
- Easy, safe disposal – reverts back to water and salt.

**Saves time, saves money,
helps to save the planet**

Call our technical team **ANYTIME**

Our products are manufactured and tested to the very highest standards so we are confident that if they are correctly used and maintained as instructed, they will be problem-free.

Whenever possible, machines will be repaired on site but if the machine needs to be taken away for repair, a replacement will be supplied if required.

Any repairs will be carried out to Original Equipment Manufacturer (OEM) standards and the machine returned as promptly as possible.

Testimonial

“It is fair to say we were very, very impressed with the results... we could certainly save money by not having to buy the range of chemical products we currently use.... with the AquaTeck unit there are no COSHH requirements because it is absolutely safe to use. It is also true to say that our staff really liked using AquaTeck because it was literally as easy as turning on the tap... odourless, completely safe to use and so no significant risk of any accident.”
