ENOZO<sub>3</sub>

GREENTECH → GLOBAL  
PURE GENIUS

Enozo<sub>3</sub>

A natural, multipurpose sanitiser and cleaner... **in your hands!**

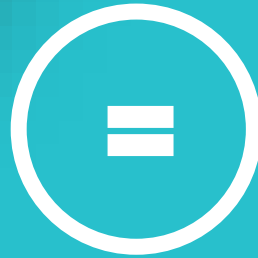

***Enozo<sub>3</sub>***

- Only uses ordinary tap water – one Enozo<sub>3</sub> bottle produces the equivalent of 600 gallons of ready to use chemical sanitiser
- No added detergents or harmful chemicals to be mixed, stored or discarded
- A 100% natural, all-purpose cleaning and sanitising solution that works faster and more effectively than environmentally harmful chemical cleaning solutions.

**The 100%  
natural way  
to exterminate  
bacteria, germs  
and viruses.**

**1 Enozo<sub>3</sub> Spray Bottle**

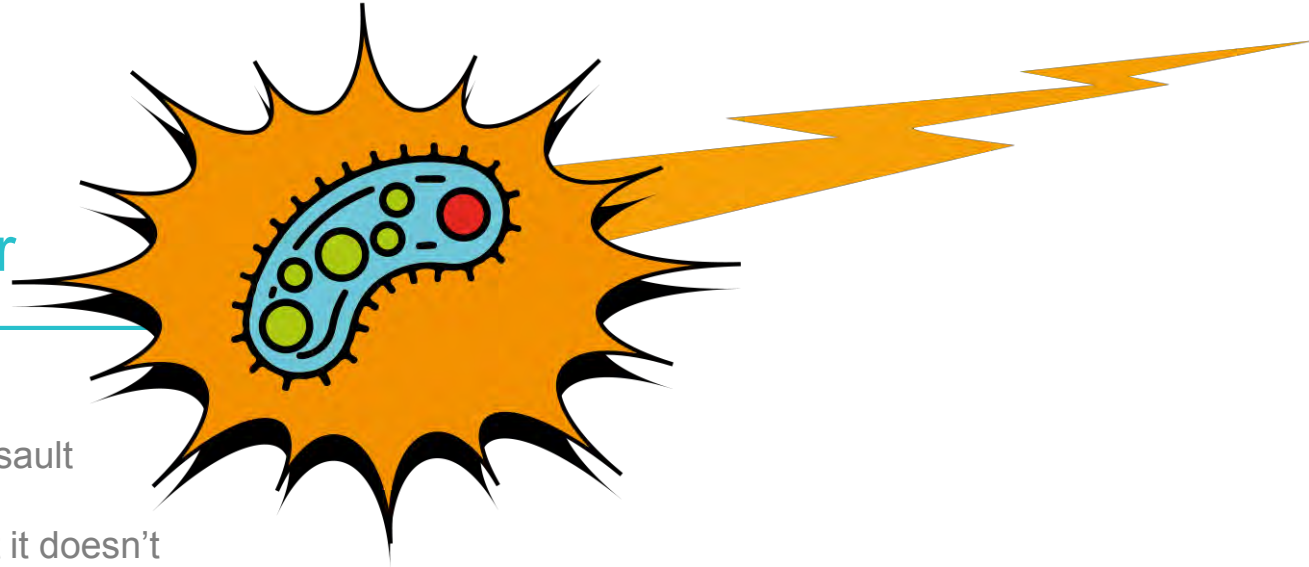

**600 gallons of  
ready to use sanitiser**

# EnozQ<sub>3</sub>

The need for a cleaner,  
greener, easier sanitiser

- Bacteria and viruses are everywhere and your facility is under constant assault
- Surfaces may appear to be clean but it doesn't mean they're hygienic
- Germs are spread easily if they are not killed constantly
- Odours from chemicals and sanitising agents can cause:
  - nausea
  - loss of appetite
  - trigger asthma
  - chemical sensitivities & allergic reactions

## How Enozo<sub>3</sub> works

---

- The Enozo<sub>3</sub> Spray Bottle incorporates an ingenious electrolytic cell made from a tiny diamond
- The cell is in the head of the trigger bottle, which ordinary water passes through before it exits the spray head
- The cell effectively adds an Oxygen atom to the O<sub>2</sub> in the water to form trioxygen O<sub>3</sub> and what is known 'Activated Water'.

# Enozo<sub>3</sub>

## How Enozo<sub>3</sub> works

- Activated Water is produced the moment the user needs it by simply pulling the trigger
- The trixygen in the Activated Water is 100% natural and occurs in the atmosphere as ozone
- No matter if you use it in the morning, night, the next week or even the next month, you will still get the same concentration of killer solution
- A 100% natural, all-purpose cleaning and sanitising solution that works faster and more effectively than environmentally harmful chemical cleaning solutions.

**EXTERMINATE**

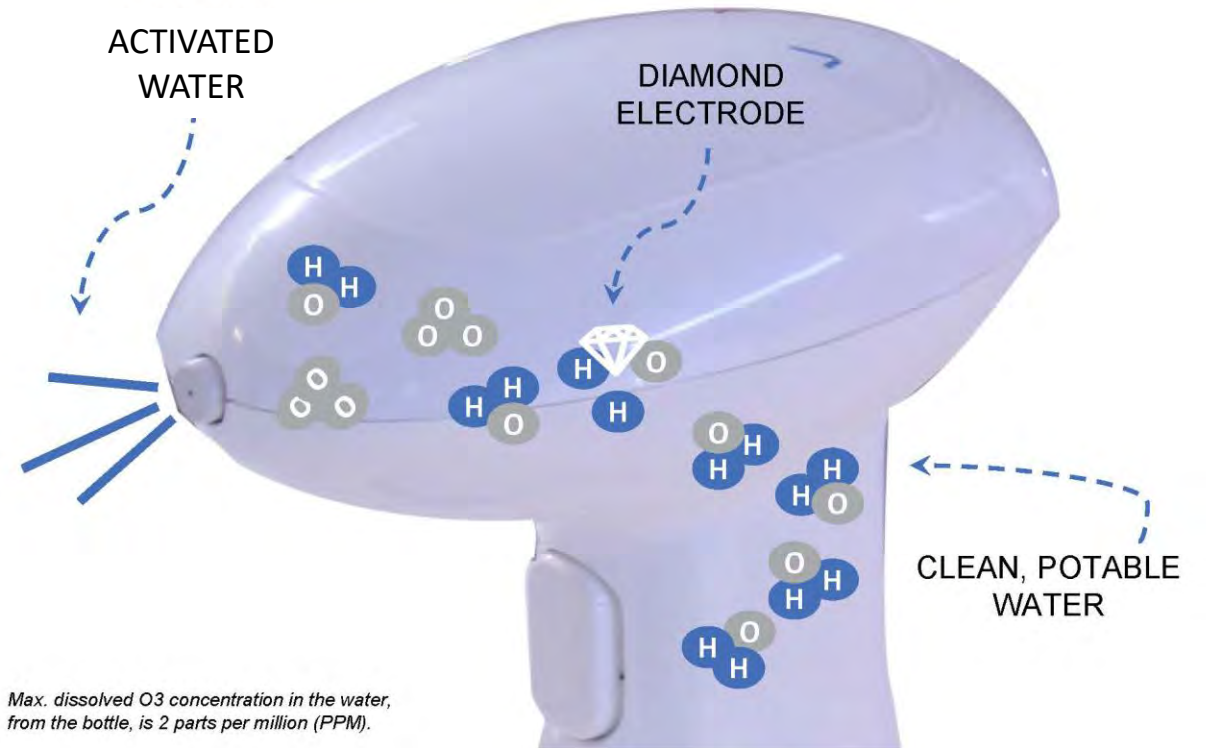

# *EnozO<sub>3</sub>*

Pure in-genius!

- Blue and Red indicator lights assure you it's working
- One-touch button reduces operator fatigue
- Polycarbonate design for strength even in commercial settings
- Quick charger with 'full battery' light indicator
- Ergonomic design for light, easy use.

## TECHNOLOGY

Safety, time and money-saving  
benefits... **on hand**

---

- Eliminates virtually all receiving, handling and inventory costs associated with making, blending, storing and transporting conventional chemicals
- Eliminates on-going replacement costs for chemicals
- Eliminates all risk of waste like spills and overuse – no chemicals to spill, to store or dispose
- Perfect stability control - will never lose efficacy when sitting on the shelf.

# ***EnozO<sub>3</sub>***

Safety, time and money-saving  
benefits... **on hand**

---

- Leaves no harmful residuals on hard surfaces, will not damage fabrics e.g. spillage on carpets
- Eliminates all errors and wasted time associated with mixing and dilution
- Superior safety – No COSHH training
- Never run out of product as long as you have water.

# *Enozo<sub>3</sub>*

**A safer alternative to chemical based sanitisers**

- Trioxygen is approved for use on organic foods per the USDA
- TUV and CE certifications
- Rigorous testing on a wide variety of surfaces with a variety of pathogens, shows Enozo<sub>3</sub> kills 99.9% of most bacteria in under 30 seconds.

 GREENTECH GLOBAL

*Enozo<sub>3</sub>*

The perfect solution

---

Enozo<sub>3</sub> is one of a range of products offered by GreenTeck Global, designed to help create a healthier, cleaner environment. At the heart of our technology is the production of trioxxygen – 100% natural and 100% chemical-free, it is known as 'Mother Nature's cleaner'.

No plastic, no chemicals, no pollution...  
the perfect solution for you and your customers.

## Call our technical team **ANYTIME**

---

Our products are manufactured and tested to the very highest standards so we are confident that if they are correctly used and maintained as instructed, they will be problem-free.

Whenever possible, machines will be repaired on site but if the machine needs to be taken away for repair, a replacement will be supplied if required.

Any repairs will be carried out to Original Equipment Manufacturer (OEM) standards and the machine returned as promptly as possible.

## Sectors

---

Enozo<sub>3</sub> is ideal for any establishment where hygiene and sanitation are of paramount importance – particularly where food and vulnerable people are involved, such as care homes. In addition, its ease of use and cost-saving benefits, make it suitable for generic cleaning and sanitising.
