

Medical Supply & Distribution

A hand holding a magnifying glass is the central focus, with the lens positioned over a network of white medical icons. The icons are arranged in a circular pattern around the hand, connected by thin white lines. The icons include a first aid kit, a test tube, a syringe, a clipboard, a pill, a nurse's cap, a heart rate monitor, a water drop, a syringe, a flask, and a doctor's head. The background is a blurred image of a person in a white lab coat, with a blue and white color scheme.

Face Masks

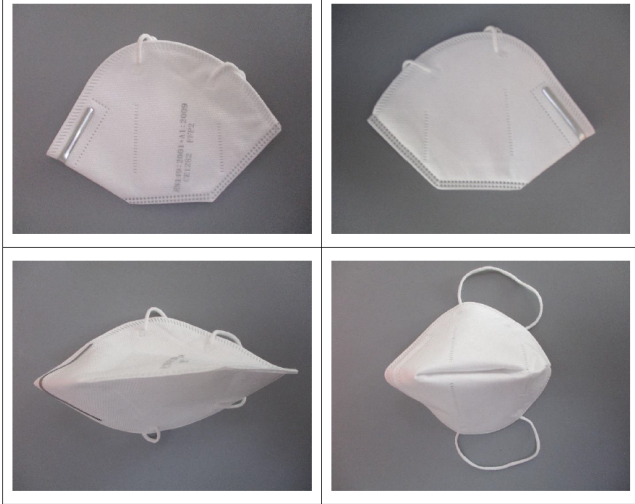

FACEMASKS

KN95/FFP2 Face Mask

Product Code: MERPPE1001

Sample Photo

KN95;

Filtering face piece respirators (FFR) are subject to various regulatory standards around the world (see examples below) and provide a much higher level of protection with face form fitting and greater pressure drop. To claim compliance with the particular standard as listed below, these respirators must meet or exceed required physical properties and performance characteristics, which can vary according to the regulatory bodies of different countries.

- N95 (United States NIOSH-42CFR84)
- KN95 (China GB2626-2006)
- FFP2 (Europe EN 149-2001)

The Center for Disease Control (CDC) recommends the N95/KN95/FFP2 for use in high risk situations, especially by medical personnel during pandemics. They are not exactly the same, but they are expected to function very similarly to one another.

Specifications

Product Name: KN95 Respirator Face Mask
Aerosol Type: Non-Oil
Color: White
Size: Universal
Exhalation Valve: No
Strap Attachment: Ultrasonic welding
Adjustable Nose Clips: Yes
Standards: KN95 (China GB2626-2006)
Certification: FDA & CE Certified

Important Notes:

1. Non-Sterile; This is not a surgical mask.
2. Not suitable for harmful gases and steam.
3. Not suitable for hypoxic environments, underwater operations or fire fighting.
4. Not for children. Adult use only.
5. Design and packaging may vary from batch to batch.

Type IIR Face Mask Sterile

Product Code: MERPPE1003

IIR 3ply Sterile Mask

These Type IIR Fluid Repellent 3-ply Surgical Face Masks have a high filtration efficiency and offer protection when there is a risk of fluid contamination. They are made from lightweight materials.

Medical face masks help prevent large particles expelled by the wearer (e.g. spit, mucous) from reaching the patient or work environment and help protect the wearer from exposure to blood and/or bodily fluids from the patient or work environment.

Medical face mask, Type IIR - EN14683, features include:

- Pleat style with ear loops or ties
- Protective four-layer protection
- Splash resistant layer protection against blood and bodily fluids
- Type IIR - EN14683 masks are appropriate for situations where exposure to blood and/or bodily fluids from the patient or work environment is at risk for the healthcare worker.
- Comfortable and Breathable.
