Clear – Collaborate - Care

Scottish Care

The Why?

- People should only need to tell their story once
- To meet the fundamental purpose of social care
- Scotland is data rich but intelligence poor
- Fragmented data collection, standards and access
- Duplication and waste
- Potential

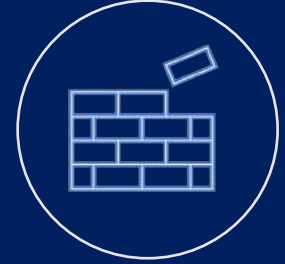

Scottish Care

Key themes

- Value (of data we hold)
- Ethics
- Power and culture
- Minimum Data Set
- Involvement
- Learning and Skills
- Money
- Role of Government
- Assessment
- Trust

Scottish Care

The How

- Involve stakeholders
- Develop a set of Principles
- Create Vision
- Map other systems and data collections
- Get involved
- Co-design product
- Test, learn, share & *embed*

Scottish Care

Principles

- People should only need to tell their story once
- Citizen led (including workforce)
- Grounded in Human Rights and ethics
- Legal context/ regulation
- Citizen activated
- Citizen controlled
- Measurable intervention that is meaningful
- #datachangeslives
- Recognise risk of unintended consequences
- Understanding the data – multiple expertise, diversity
- The system/ the person is the point of integration
- Incremental implementation, build in proof points
- Relevant

Scottish Care

Topics

- Assessment
- Point of transitions e.g. into and out of hospital
- linking to the work on RESPECT.
- Collaborations with CASPA

“We must ensure throughout that we’re not throwing a solution in where there’s not a problem.”

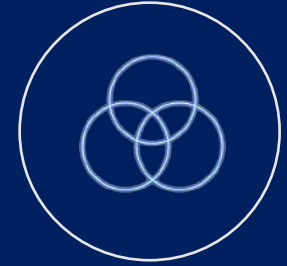

Scottish Care

Assets:

- DHI - demo and sim environment, including 'art of the possible' demos,
- MyDex - interested to explore applied research - to map out friction/effort/risk/cost around a challenge that care providers have around particular condition that crosses organisational boundaries.
- DataLab – Contribution on data set and data curation, art of the possible in terms of future analysis predictive analysis – the project should be ambitious and innovative.
- Scottish Care – connector and writer of vision.
- CASPA – expertise on 'flow' in an intelligent commissioning context
- Scottish Government Data Strategy
- Funding opportunities e.g. Health Foundation, Nesta, ESRC

Scottish Care

Actions:

- Set of Principles
- Vision for Data in Social Care
- Invite CASPA and SG Data Strategy Lead to present at next forum
- Explore Challenge
- Brokerage – trusted person (RESPECT/ Chal. Albert King SG Data delivery?). Research data Scotland - Roger Halliday, Shannon
- Groundswell - #datachangeslives
- Social media template
- Definitions – direction and involvement and data/intelligence/information and interoperability (EU definition) <https://joinup.ec.europa.eu/collection/nifo-national-interoperability-framework-observatory/3-interoperability-layers>
- Contribute – skills assets contributions funding

THANK YOU
