Scottish Care

The Why?

- People should only need to tell their story once
- To meet the fundamental purpose of social care
- Scotland is data rich but intelligence poor
- Fragmented data collection, standards and access
- Duplication and waste
- Potential

Scottish Care

The How

- Involve stakeholders
- Develop a set of Principles
- Create Vision
- Map other systems and data collections
- Get involved
- Co-design product
- Test, learn, share & *embed*

Key themes from Data Forum 2

- Data capture must serve a purpose and make a difference
- Not citizen-owned, but citizen *controlled*
- Capacity, consent and authority needs to be considered
- Shared understanding of data and intelligence (Europa definition)
- Risk of incomplete data and unintended consequences
- Political drivers
- Local drivers and influence – geographical specific collaboration

“We must ensure throughout that we’re not throwing a solution in where there’s not a problem.”

Scottish Care

Principles

- People should only need to tell their story once
- Grounded in Human Rights and ethics
- Within legal parameters and regulation
- Citizen activated and citizen controlled
- Shared understanding
- Measurable intervention that is meaningful
- Groundswell #datachangeslives.
- Notice and avoid risks
- Systems should not get in the way
- Integration, Involvement and Interdisciplinary data
- Learning and Skills Implementation
- Review and fluidity Principles must not be set in stone
- Incremental implementation

Scottish Care

Assets:

- DHI - demo and sim environment, including 'art of the possible' demos,
- MyDex - interested to explore applied research - to map out friction/effort/risk/cost around a challenge that care providers have around particular condition that crosses organisational boundaries.
- DataLab – Contribution on data set and data curation, art of the possible in terms of future analysis predictive analysis – the project should be ambitious and innovative.
- Scottish Care – connector and writer of vision.
- CASPA – expertise on 'flow' in an intelligent commissioning context
- Scottish Government Data Strategy
- Funding opportunities e.g. Health Foundation, Nesta, ESRC

THANK YOU
