

Care Technologist Project Self - Referral Guide

If you are someone who accesses care, you can refer yourself to a Care Technologist who will get to know you and what matters to you. They will then explore what technologies may be useful to you.

Whether you are a complete technophobe, or a whiz with anything digital, the Care Technologist will be there to support you to use the technology that is right for you.

You can text or send an e-mail to request a call from one of the team. The contact details for your local Care Technologist are below.
