

# PROFESSIONAL DEVELOPMENT AWARD TECHNOLOGY ENABLED CARE SCQF LEVEL 7

## Cohort 1 – January 2023

### About the award:

- Delivered online, so you can study when and where is suits you.
- Supports your continuing professional development, enabling you to renew practice and keep knowledge current.
- Provides opportunities for networking and collaborative learning with cohort participants across the sector.
- Self-directed learning hosted on a virtual learning platform providing the opportunity for you to develop underpinning knowledge.
- Complete in one 17-week semester starting on **23 January 2023**.
- 2-hour mandatory online group induction w/c **16 January 2023**.

*Increase your use of technology for the benefit of the people you support*

*Build your knowledge, skills and practice in Technology Enabled Care*

**NHS Education for Scotland are pleased to announce that further funding is available for candidates to undertake the Professional Development Award in Technology Enabled Care, delivered in partnership with the University of the Highlands and Islands, Perth College.**

The award has been designed and developed to support Scotland's Digital Health and Care Strategy and is ideal for frontline roles in social work, social care, health or housing organisations, including those working in care at home or care homes, across the public, private and third sector.

It will equip participants with the skills to promote the use of technology across the sector, empowering them to evaluate and adopt emerging technologies that support health and care delivery while reflecting on how these could be used to assist people to self-manage and live independently.

Applications close

**5.00pm Thursday 24 November 2022**
